To

The Firms dealing in Electrical Materials.

Enquiry No. 1762.

FUSIBLE CUT-OUTS FOR DODBALLAPUR TRANSMISSION LINE.

GENTLEMEN,

I write to request you to quote your best price and earliest time of delivery for the following materials :—

One Set of Three Single-Phase, out-door type, expulsion fusible cut-outs, 35,000 volts, 200 amperes.

The cut-outs must have an interrupting capacity of not less than 6,000 amperes (R.M.S.) at rated voltage.

The cut-outs should be capable of operation as isolating switches by means of hickory rods.

The tenderers must furnish full details and drawings regarding the design, construction and dimensions of the fusible cut-outs. Technical details such as dry and wet flash-over voltages of the insulators used for mounting the fusible cut-outs, their leakage distance, bending strength, guaranteed values for puncture under oil, dry and wet flash-over voltages and the rupturing capacity of the fuses must be furnished without which the tenders will not be considered.

The tenderers should also quote prices for spare mounting insulators and for fuse links of 10 and 20 amperes continuous current carrying capacities respectively.

The prices to be quoted should be for delivery, c.i.f., Madras.

This enquiry will close on 30th April 1936.

No. S. P. C. 15439-46, *dated 23rd March* 1936.

To

The Firms dealing in Groundnut Oil.

Enquiry No. 1763.

DEAR SIR/GENTLEMEN,

Please be good enough to intimate your best prices and the earliest time of delivery for the materials described in the attached schedule, in the form printed below.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions :—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellations of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for Groundnut Oil" with the above enquiry number.

This enquiry will be closed on the 4th April 1936.

Schedule.

Item No.	Description of material offered	Quantity	Price quoted F. O. R.	Time of delivery
	Groundnut Oil of best quality (Pure and free from sediment) packed in sound non-leaky tins	20 tons	Bangalore City.	

N.B.—(1) The quantity of oil required is 20 tons and the quality of the oil should be first class, colourless, quite pure and free from sediment and should be quite suitable for soap making.

(2) The oil will be required to be delivered at the Soap Factory in two equal monthly instalments, the first supply being made by the 15th of April 1936.

(3) Two sets of sealed samples of the oil should accompany the tender. The Stores Purchase Committee reserve the right to draw samples from the supply and have them tested at our Government Testing Laboratory in order to check whether the supply is according to the sample and of the quality required. The cost of such test check at Rs. 15 per test should be borne by the suppliers.

(4) Supplies made otherwise than in accordance with the accepted quality will be rejected at the contractor's risk and they will be required to replace the rejected supplies by correct material conforming to the approved sample.

No. S. P. C. 15476-82, *dated 27th March* 1936.

The Firms dealing in Electrical Materials.

Enquiry No. 1771.

ELECTRICALLY DRIVEN BLOWER FANS.

DEAR SIR—GENTLEMEN,

Please be good enough to intimate your best prices and the earliest time of delivery for the materials described in the attached schedule, in the form printed below.

It should be distinctly understood that the acceptance by us of your quotation will be subject to the following conditions :—

Withdrawal from the quotation after it is accepted or failure to make the supply within the specified time or according to specifications will entail cancellations of the order and purchases being made at your expense from other sources in addition to the levy of a penalty of 3 per cent of the value of the order as and by way of liquidated damages. In such an event, the Stores Purchase Committee reserve the right to remove your name from the list of approved firms.

The quotations should be superscribed "Quotations for electrically driven blower fans" with the above enquiry number.

This enquiry will be closed on the 11th April 1936.

Schedule.

Item No.	Description of material offered	Quantity	Price quoted F. O. R.	Time of delivery
	Electrically driven blower fans of the description given below, required for the purpose of circulating the hot air inside the tobacco curing barns	2 sets.	Bangalore City.	

Item No.	Description of material offered	Quantity	Price quoted F. O. R.	Time of delivery
	The fan should be able to discharge 3,500 c.ft., of air per unit. The bearings and the fan-blades and the casing, or in other words the whole fan assembly should stand a temperature of 200° F. The motor should be suitable for running on an A.C. current, 220 volts and it should stand, if possible, up to a temperature of 200° F. under normal working. The fan and the motor should be coupled together by means of a coupling. There should be at least 6" of shafting between the fan casing and the motor casing, because it is proposed to put the fan in the chamber where the temperature of the air is about 200° F. and keep the motor out of it in case the motor cannot be made to stand the temperature of 200° F.			

N.B.—(1) Quotation should be for delivery f.o.r., Bangalore City. The time within which the two sets required will be delivered should be definitely stated in the quotation.

(2) The name of the manufacturers and the type of blower fans offered should be clearly stated. Illustrated pamphlets of the blowers offered, if any, should accompany the quotation.

(3) Two sets of the blower fans are required for the present for experimental purposes. If the sets offered are satisfactory and suitable for our requirements more sets will be ordered.

No. S. P. C. 15946-50, *dated 27th March* 1936.

To

The Firms dealing in Chlorinators.

Enquiry No. 1775.

CHLORINATOR FOR SIVASAMUDRAM WATER WORKS.

GENTLEMEN,

Please intimate your best price and earliest time of delivery f.o.r., Maddur for a chlorinator capable of chlorinating about 200,000 gallons of water per day the dosage ranging from 0·1 part per million to about 1·0 part per million, as per specification enclosed.

The chlorinator should be equipped with the necessary stop valves, reducing valves, regulating valves, filter and all the necessary accessories including the solutioniser with pipes and fittings, etc., complete.

The quotations should be accompanied by detailed specification of the chlorinator with instruction books and drawings.

It should be distinctly understood that should your quotation be accepted, you will be required to make the supply within the stipulated time and in conformity to the specification furnished with your tender, failing which the order would be subject to cancellation. In such an event, the Stores Purchase Committee reserve the right to levy a penalty of 3 per cent of the value of the order as and by way of liquidated damages in addition to debiting you with any extra cost that may be incurred in having to obtain the materials from other sources.

The enquiry will be closed on 20th April 1936.

Specifications for a Chlorinator for Sivasamudram Water Works.

General arrangement of the existing water supply system at the place :—

Water is drawn from the canal and let into a coagulating tank with alum solution. The settled water is pumped by centrifugal pumps through pressure filters into a storage reservoir from which the distribution to different quarters is given.

The chlorinator should either be suitable to feed the chlorine solution into the pressure main against a head of about 150 ft. or by gravity into the sump well at the foot valve.

The chlorinator should be of bubbling type, the number of bubbles corresponding to certain parts of chlorine per million parts of water. These dosages have to be clearly given on the board in which the various valves such as reducing valves, regulating valve, filter, sulphuric acid container, etc., so that the Operator can easily adjust the dosage with reference to the table given.

The usual absorption tower (or solutioniser) should be included in the quotation.

Necessary flexible pipes, washers and joints with complete drawings and instruction books should also be sent.

All joints should be absolutely leak proof so that the gas may not escape in any of them.

The range of capacity should be from 0 to 1 part per million parts of water. The maximum capacity of water to be treated is about 200,000 gallons per day.
